ABSTRACT

Questionnaire-derived data in this report are directly comparable to data published for both 1973 and 1975. The fall 1975 college and university enrollment statistics show a 9.4 percent rise, the third consecutive year of an accelerating rate of growth. In addition to one institutional listing with summary enrollment data, this report includes tabulations aggregated by state and by control and level of institution. A number of simple tables and graphs present selected enrollment data in the brief text at the beginning of the report. Survey background and the survey report form are appended. (Author/LBH)

## NATIONAL CENTER FOR EDUCATION STATISTICS

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall . . . collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; . . . and review and report on educational activities in foreign countries."—General Education Provisions Act, pt. A, sec. 406(b)(1), (2), (4), as added by P.L. 93-380, Aug. 21, 1974, at 88 Stat. 556.

## PREFACE

The questionnaire used in the fall 1975 enrollment survey was essentially the same as that used in the 2 years immediately preceding, except for the addition of two columns pertaining to credit hours. Unfortunately, since the lack of uniformity among institutions regarding credits, credit hours, and "normal" credit-hour loads produced either inadequate data or data that did not lend themselves readily to validation, the decision was made not to publish these data in any form. The data which are included in this report, therefore, are directly comparable to data published for both 1973 and 1974.

In addition to one institutional listing with summary enrollment data, this report includes tabulations aggregated by State and by control and level of institution. A number of simple tables and graphs present selected enrollment data in the rather brief text at the beginning of the report.

## ACKNOWLEDGMENTS

The cooperative efforts, both direct and indirect, of many people are responsible for the publications and other projects that result from the Higher Education General Information Survey. The authors of this report are especially appreciative of the efforts of Rita D. Arroyo at various stages of the survey on which this report is based.

The continuing cooperation of the registrars and other college and university officials who supplied the raw data is deeply appreciated.

## INTRODUCTION

In fall 1975, college and university enrollment registered a surprising 9.4-percent rise, reaching an all-time high of 11,290,719--almost a million more than in 1974 (table I). This was the third consecutive year of an accelerating rate of growth, a three-fold increase over the 3.0-percent rate from 1971 to 1972.

The fall of 1975 saw another landmark: 78.8 percent of the students in higher education were enrolled in public institutions, thus continuing the 25-year trend of an ever-increasing proportion of total enrollment in the public sector. Trends in other areas also persisted: continuing increases in the proportion of total enrollment accounted for (1) by women (by only a statistically insignificant 0.005 of a percentage point--from 45.094883 percent in 1974 to 45.099838 in 1975), and (2) by students enrolled part time (38.7 percent of the total in 1975). On the other hand, a small but gradual decline has taken place in the proportion of total enrollment accounted for by first-time entering freshmen; the proportion has declined each year, from 25.2 percent in 1968 to 22.5 percent in 1975.

Background information on the survey population is presented in appendix A, together with "traditional" and "current" classification methods of aggregating institutional units, and questionnaire editing procedures. A reproduction of the survey questionnaire, with summary data superimposed, and survey instructions and definitions are found in appendix B.

### Control and Level of Institution

Continuing a long-established trend, publicly controlled institutions of higher education showed a greater percentage gain in total enrollment (10.5 percent) in fall 1975 than did private institutions (5.4 percent), although private institutions more than doubled their rate of increase from 1974 to 1975 (from 2.5 percent to 5.4 percent)(table II). (The proportions of total enrollment accounted for by the public and private institutions are shown in figure A).

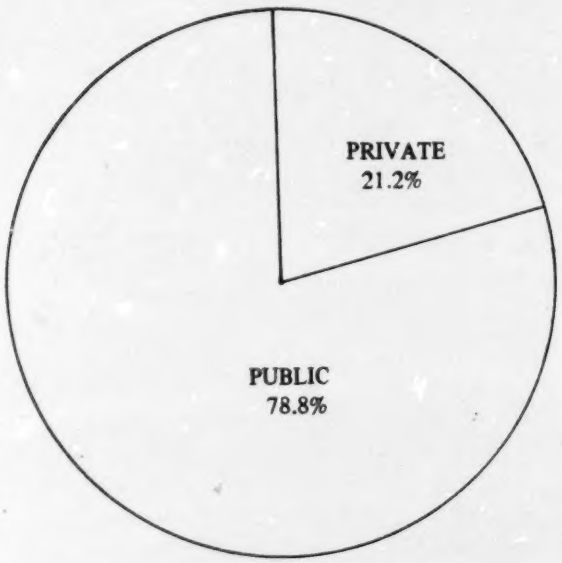
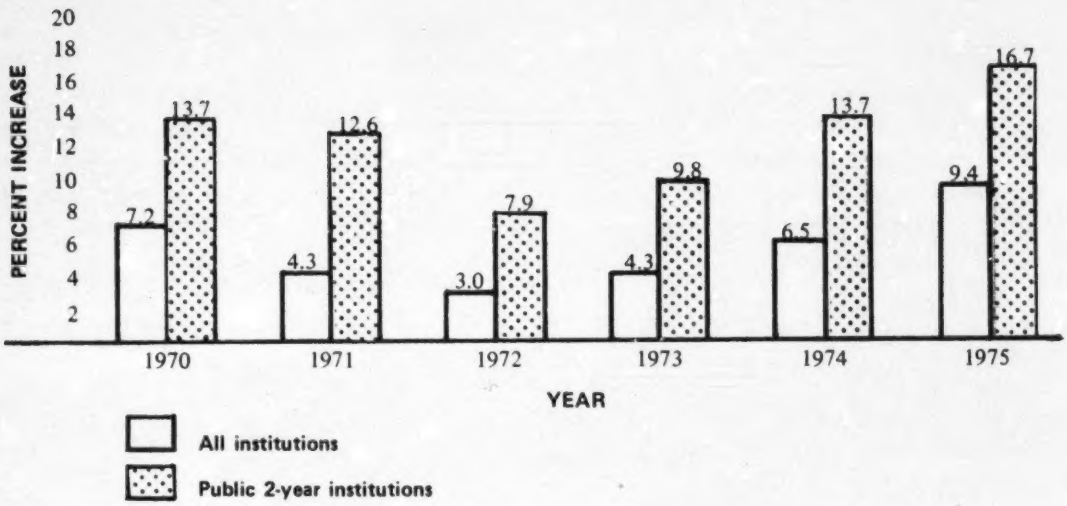
Figure A.–Proportion of enrollment, by control of institution: Fall 1975



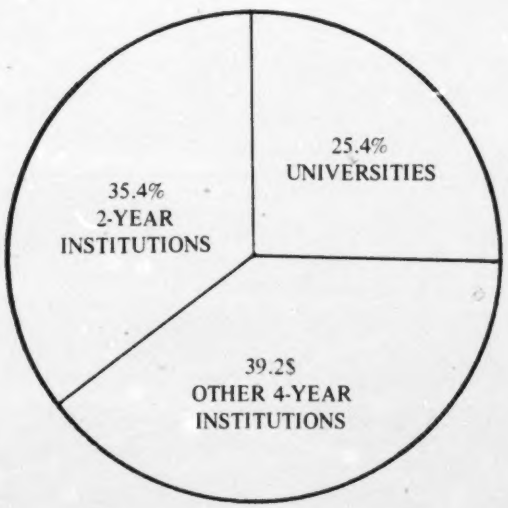
Following another long-term enrollment trend, 2-year institutions outgained 4-year institutions by a considerable margin. (Enrollment proportions by level of institution are shown in figure B.) As usual, the public 2-year institutions led all other control-level groups of institutions, with a rise of 16.7 percent. Not as usual, however, the enrollment in private 2-year schools gained by almost as much--16.3 percent--after a decline in 1974 of 2.3 percent. Because enrollment in the private 2-year institutions is only a fraction of that in public 2-year institutions (3.9 percent), this gain obviously has much less impact on overall enrollment. Public 2-year institutions, on the other hand, affect overall enrollment substantially. During the period since 1970, enrollment in public 2-year institutions has in each year increased at a greater rate than overall enrollment in all institutions (figure B). Moreover, they have shown the same relative changes in the rate of increase (figure C).

**Figure B.--Annual rates of increase in enrollment in all institutions and in public 2-year institutions: Fall 1970 to fall 1975***



*Percentage increases in enrollment shown for 2-year institutions for the years 1973, 1974, and 1975 include data for 2-year branches of 4-year institutions (current aggregation). For the years 1970, 1971, and 1972, 2-year branches of 4-year institutions are not included (old aggregation). Comparable data for 2-year institutions for the latter three years are: 1973--9.6 percent, 1974--13.3 percent, and 1975--16.9 percent.

**Figure C.--Proportion of enrollment, by level of institution: Fall 1975**

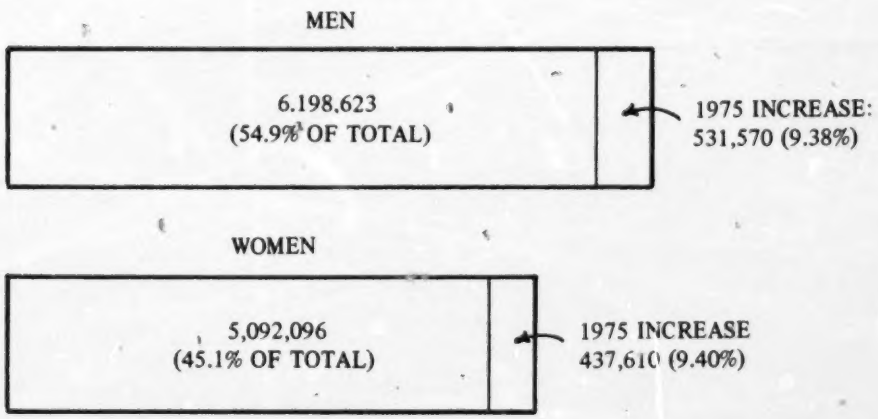


In 1975, the most dramatic change in enrollment occurred in the private 2-year institutions, where a substantial increase (16.3 percent) reversed a decline of 2.3 percent in the previous year. Enrollment in all other control-level groups of institutions increased in both years, with greater percentage increases in fall 1975 than in fall 1974 (table I).

Sex

Fall 1975 saw an enrollment trend of long duration virtually halted: that of female students annually gaining an ever-larger share of total enrollment When the percentage rate of increase is carried only to the customary single decimal place, men and women appear to have gained at the same rate--9.4 percent. However, carrying the fraction to several more decimal places reveals that women did increase in enrollment at a slightly greater rate in 1975 than did men--9.40 percent versus 9.38 percent (figure D).

Figure D.--Total enrollment, by sex of student: Fall 1975



In public institutions, the rate of gain was slightly greater for men than for women (figure E), but in private institutions, women showed the greater rate of increase. In both the public and private sectors, however, men students were still in the majority (figure F). As a matter of fact, this condition prevailed in all control-level categories in fall 1975. In the 3 previous years, 1972 through 1974, the number of women enrolled in private 2-year institutions had exceeded the comparable enrollment for men. In 1975, however, even though the

enrollment of women in private 2-year institutions increased by 9.4 percent (matching the overall rate of growth for all students in all institutions), the enrollment of male students in those same institutions increased by 24.1 percent (figure G), thereby giving men a majority position (50.6 percent) in private 2-year institutions.

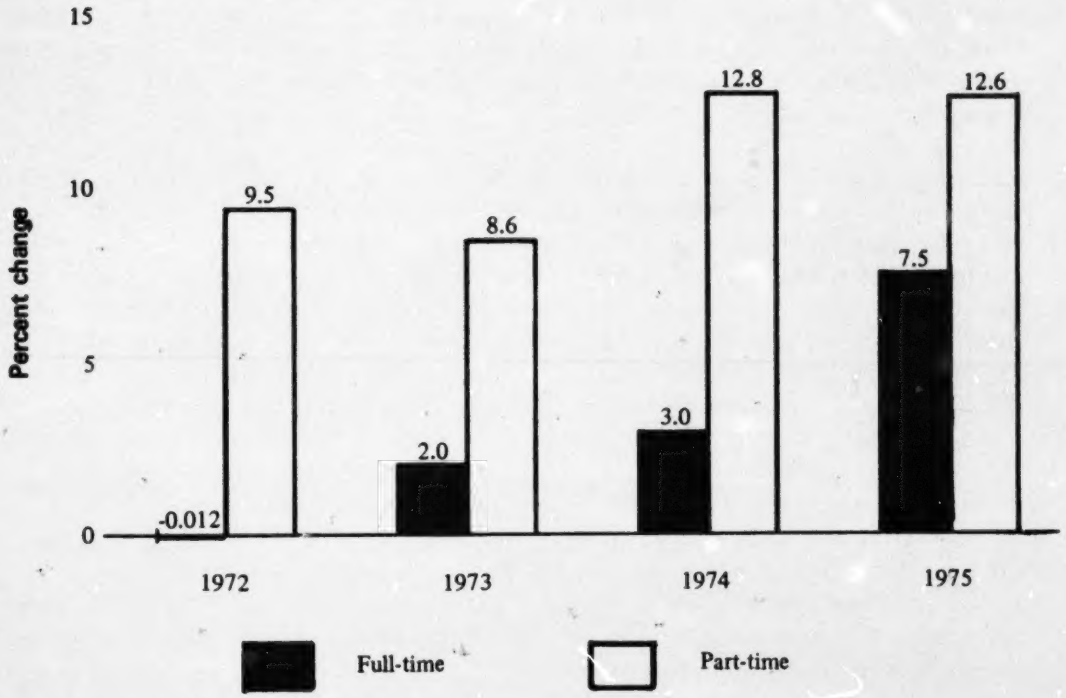
## Attendance Status

Since 1972, when the enrollment of full-time students sustained a very small loss, the enrollment of part-time students has grown at a much faster pace than the enrollment of full-time students (figure H).

**Figure H.--Rates of growth of enrollment in all institutions, by attendance status: Fall 1972 to fall 1975**



While the rate of growth in the number of part-time students remained high for that entire period 1972-1975, the growth in the enrollment of full-time students recovered from its temporary stagnation in 1972 to a substantial rate of increase (7.5 percent) in 1975. In both 1973 and 1974, the rate of increase in part-time enrollment was more than quadruple that of full-time enrollment, but in 1975 a steep rise in the rate of growth of full-time enrollment reduced that ratio to less than double.

Full-time enrollment exhibited the largest percentage increases between 1974 and 1975 in 2-year institutions, both public and private (17.1 and 14.5 percent, respectively). The rate of growth of full-time enrollment did decline in one control-level category, private universities, from 2.4 percent in 1974 to 0.9 percent in 1975.

In public institutions, the rate of growth of part-time enrollment, although remaining quite high, did slacken slightly from the comparable rate in 1974--from 14.5 percent to 13.7 percent. Meanwhile, the rate of growth of full-time enrollment increased substantially--from 3.4 percent in 1974 to 8.3 percent in 1975. The rate of growth of full-time enrollment in the public sector was most pronounced in 2-year institutions, which showed the sharpest increase, from 6.2 percent in 1974 to 17.1 percent in 1975. The public universities and other 4-year institutions also had substantial increases in the rate of growth of full-time enrollment.

Accompanying the upsurge in the rate of growth of full-time enrollment, the enrollment of part-time students continued to grow at a high rate in 1975 (figure H). Among all public institutions, the number of part-time students increased by 13.7 percent in 1975, with the highest rate of growth in the 2-year institutions--16.5 percent (actually slightly less than the rate of growth for full-time enrollment within that particular group of institutions)(table III). Public universities showed growth at a rate of 14.1 percent and other 4-year institutions at the relatively modest rate of 8.0 percent.

Among the private institutions, both universities and 2-year institutions showed increases in the rate of growth of part-time enrollment, but other 4-year institutions showed a drop from the 1974 rate. In fact, in the private sector, other 4-year institutions were the only category for which the rate of growth for part-time enrollment was actually less than the rate for full-time enrollment.

As a result, part-time students have grown in proportion from 32.1 percent of total enrollment in 1971 to 38.7 percent in 1975 (figure I).

Level of Enrollment and Type of Program

Enrollment in programs leading to a bachelor's or higher degree increased by more than 700,000 (7.9 percent) between fall 1974 and fall 1975 (table IV). Meanwhile, enrollment in vocational and technical programs leading to awards below the baccalaureate level continued rapidly upward, the increase of 20.5 percent in 1975 almost double the 10.9-percent increase in 1974. There was a 15.9-percent loss of

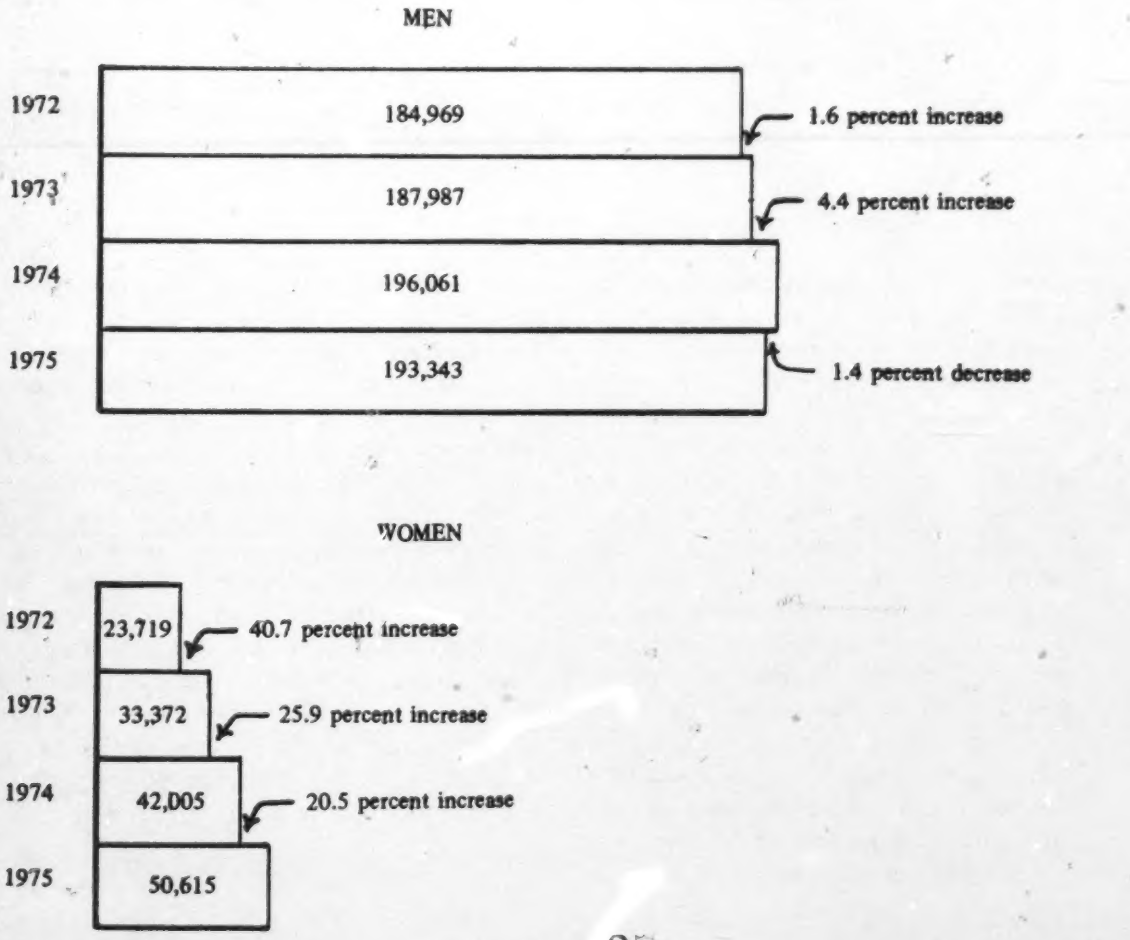
enrollment in vocational-technical programs in private institutions in 1975. However, since vocational-technical enrollment in private institutions represented only 3.3 percent of the total in those programs in all institutions, the loss only slightly offset the 22.2-percent gain in public institutions. Universities, with a very small enrollment in vocational-technical programs, showed a spectacular increase (34.6 percent) in 1975 with a relatively small headcount increase (5,153). Other 4-year institutions, also with a relatively small enrollment in these programs, posted a fairly substantial percentage loss (-14.4 percent) with a drop in headcount of less than 9,000. The 2-year institutions, especially the public community colleges, enrolled the bulk of vocational-technical students, showing a gain of 22.3 percent in 1975. Although women accounted for somewhat more than half of the enrollment in these programs, men showed a greater rate of increase (24.6 percent) in 1975 than women (17.0 percent). Full-time students, who constituted 56.9 percent of all vocational-technical enrollment, increased by 26.2 percent in 1975, while the number of part-time students increased 13.8 percent.

Enrollment in bachelor's or higher degree-credit programs, which increased at a somewhat faster rate in public than in private institutions and at a considerably faster rate in 2-year institutions than in universities or other 4-year institutions, gained at an overall rate of 7.9 percent in fall 1975. The number of part-time students increased at twice the rate as that of full-time students and women gained at a faster rate than men (table IV).

Undergraduate enrollment in bachelor's degree-credit programs increased by 5.4 percent in 1975, up from the 4.4-percent gain in 1974, with the enrollment of women increasing a little faster than that of men. First-professional enrollment increased at a very modest 2.5-percent rate, primarily because male enrollment declined by 1.4 percent (figure J). Inasmuch as women accounted for only about one-fifth of

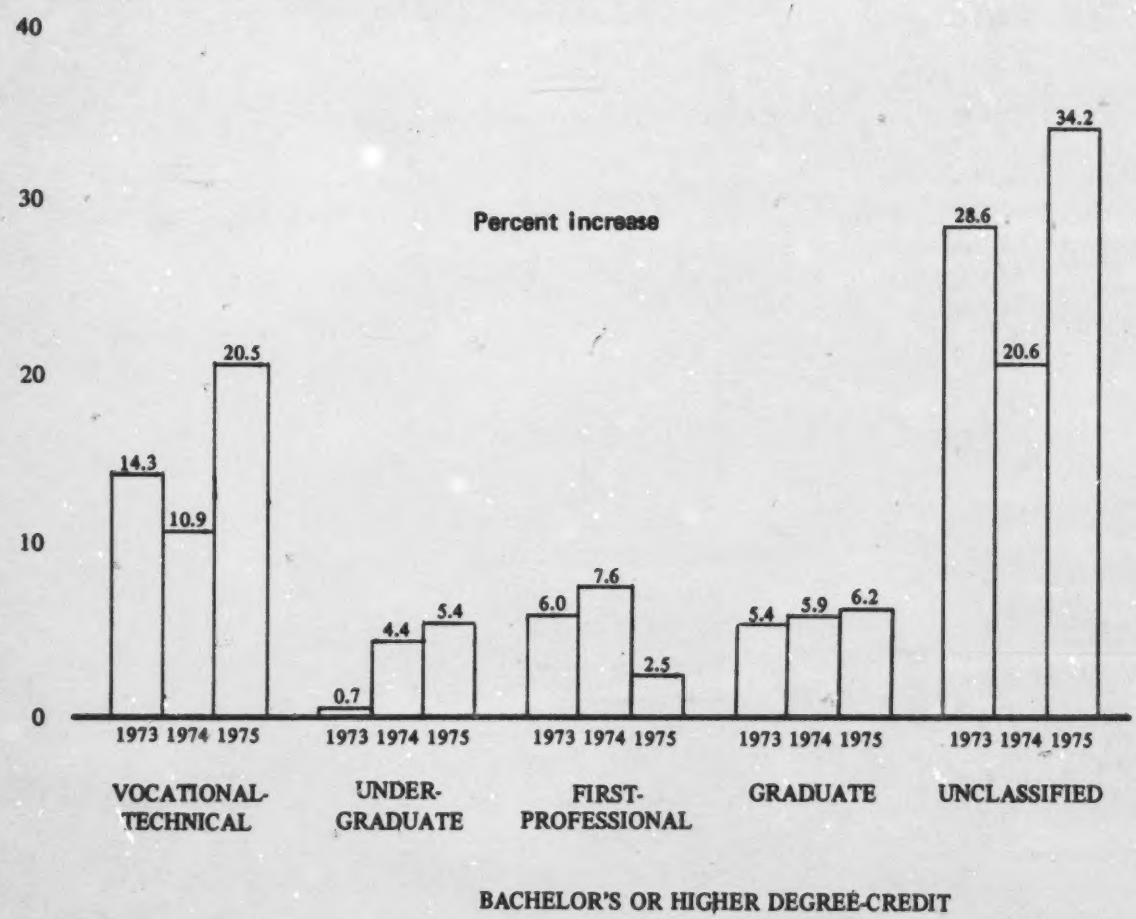
**Figure J.--Changes in the enrollment of men and women in first-professional degree programs: Fall 1972 to fall 1975**



all first-professional students enrolled, the impact of their 20.5 percent gain was severely diluted, in the context of total first-professional enrollments, by the relatively small loss sustained by male students.

Graduate enrollment increased at a slightly greater rate in 1975 (6.2 percent) than in 1974 (5.9) but was still considerably below the overall 9.4-percent increase for total enrollment. Men still constituted a majority of graduate students, but, as with most categories of enrollment, the number of women increased at a greater rate than did the number men.

Figure K.--Changes in enrollment, by level: Fall 1973 to fall 1975



The enrollment of unclassified students continued to show the greatest rates of gain among all categories, increasing by more than a third (34.2 percent) in 1975 (figure K). Although here, too, women's enrollment increased at a greater rate than men's, the difference was small (34.5 percent compared to 34.0 percent). However, with the enrollment of unclassified students topping the 1 million mark, women continued to account for just over half of the total.

## First-Time Freshmen

The enrollment of students entering college for the first time, as freshmen, increased by 6.3 percent in fall 1975, only a fraction less than the rate of increase in 1974 (6.4 percent)(table V). Public institutions showed a greater rate of increase (6.8 percent) than private institutions (4.1 percent)(figure L). As might be expected, the rate of increase in

2-year institutions (9.2 percent) was considerably greater than the rate in universities (1.6 percent) and other 4-year institutions (3.9 percent). One rather surprising statistic, however, is that the number of men increased at a greater rate than the number of women (6.7 percent as compared with 5.8 percent). Part-time enrollment followed its well-established pattern by increasing at a greater rate (8.5 percent) than full-time enrollment (5.4 percent). First-time enrollment in vocational-technical programs followed the overall trend of total enrollment in these programs with a 17.4-percent increase, compared with a 3.2-percent increase in bachelor's degree-credit programs.

1/ Readers should be reminded that although enrollment does change every year, so does the number of institutions accounting for this total enrollment. Accordingly, the numbers of institutions in each year for which enrollment data are shown in the table are as follows: 1975 - 2,782; 1974 - 2,763; 1973 - 2,736; 1972 - 2,680; 1971 - 2,617; 1970 - 2,565; 1969 - 2,536; 1968 - 2,495; 1967 - 2,382; 1966 - 2,337; 1965 - 2,238; 1964 - 2,183.

2/ A first-time student is defined as a new freshman (in the fall term) who has never previously been enrolled in an institution of higher education. First-time students are included in the appropriate "total, all students" counts. Data for first-time students for years prior to 1966 are not comparable since they include only first-time students in programs chiefly creditable toward a bachelor's degree.

## APPENDIX A

## SURVEY BACKGROUND

The Education Directory, 1975-76, Colleges and Universities 1/ was the source for the list of institutions included in the survey on which this report is based.

Institutions of higher education (or the individual branches of multi-campus institutions) included in this report are classified as either 2-year or 4-year institutions, with universities as a separate sub-classification of the latter. The 4-year institutions are those that offer programs extending at least 4 years beyond high school. They comprise all institutions that grant bachelor's or higher degrees or some recognition equivalent to such degrees; e. g., ecclesiastical recognition in theological institutions. Some 4-year institutions also offer organized occupational programs of less than 4 years that result in an associate degree or some other recognition of completion such as a certificate or diploma. Universities are those institutions that place considerable emphasis on graduate instruction and have at least two professional schools that are not exclusively technological.

Since 1972, in addition to classifying and aggregating branches of institutions in the traditional way (i. e., with their parent institutions), the National Center for Education Statistics (NCES) has also been aggregating branches in a new way: with other institutions and branches at the same (organizational) level. It was intended that, for a few years, higher education statistics acquired through the Higher Education General Information Survey program would be published with data for branches aggregated by both the old and new methods, with an eventual changeover gradually taking place. To that end, fall enrollment publications from 1972 through 1974 2/ included tabulations of data by both methods. In this publication for fall 1975, however, only the new method of aggregation has been employed in the tables presented. Tables with data aggregated by the old method are available on request, and NCES expects to maintain indefinitely the capability of tabulating data for branches by both methods of aggregation for future surveys.

2/ For a detailed explanation of the relationship between the two methods of aggregating branches, see Fall Enrollment in Higher Education, 1974 (NCES 76-001), p. 118.

Inasmuch as current emphasis is being placed on individual institutional units, with branches counted and classified independently of their parent institutions, users will find the following tables of considerable assistance in understanding the impact of aggregating branches with institutions at their own organizational level, rather than with their parent institution.

The numbers of institutional units in the fall 1975 survey, and for comparison in the fall 1974 survey, were as follows:

| | 1975 | | | 1974 | | |
|---|---|---|---|---|---|---|
| | Total | Public | Private | Total | Public | Private |
| All institutional units | 3,055 | 1,454 | 1,601 | 3,038 | 1,453 | 1,585 |
| Universities | 161 | 96 | 65 | 161 | 96 | 65 |
| Other 4-year | 1,651 | 365 | 1,286 | 1,626 | 364 | 1,262 |
| 2-year | 1,056 | 826 | 230 | 1,058 | 818 | 240 |
| 4-year branch of university | 102 | 92 | 10 | 102 | 92 | 10 |
| 2-year branch of university | 67 | 67 | -- | 75 | 75 | -- |
| 2-year branch of other 4-year | 18 | 8 | 10 | 16 | 8 | 8 |

The numbers of institutions (the count by the old method of aggregation) in the fall 1975 survey, and for comparison in the 1974 survey, were as follows:

| | 1975 | | | 1974 | | |
|---|---|---|---|---|---|---|
| | Total | Public | Private | Total | Public | Private |
| All institutions | 2,782 | 1,227 | 1,555 | 2,763 | 1,222 | 1,541 |
| 4-year institutions | 1,779 | 452 | 1,327 | 1,756 | 452 | 1,304 |
| Universities | 159 | 94 | 65 | 159 | 94 | 65 |
| Other 4-year | 1,620 | 358 | 1,262 | 1,597 | 358 | 1,239 |
| 2-year institutions | 1,003 | 775 | 228 | 1,007 | 770 | 237 |

For the convenience of the reader, the questionnaire, instructions, and definitions used in the survey are reproduced in appendix B of this report. Complete data were received for all 3,055 units (2,782 institutions) in the survey, and total enrollment figures for these institutional units have been entered in each cell of the questionnaire.

Questionnaire Editing

Each report form filed in this survey was compared with the report form filed by each institutional unit for the comparable 1974 survey. Large differences in enrollment patterns were accepted if reasons for them were readily apparent. If further information was needed, respondents were contacted by letter and/or telephone for verification, revision, or additions to the figures reported. These procedures undoubtedly eliminated the larger reporting errors, but the extent to which small, unrecognized errors may remain is unknown.

For the convenience of the reader as well as for ease in statistical tabulation, totals have not been rounded but are given as they were obtained--by simple addition of the figures for individual institutional units. This does not imply that totals and subtotals are accurate to the last digit. It was believed, however, that the data could be more conveniently used if the many subtotals obtained in the analysis were reported in such a way that they would add exactly to the totals. Also, in view of the care with which the data were compiled by respondents and reviewed by the National Center for Education Statistics, it seemed appropriate that the totals reflect the individual reports.

7. IF THE EDUCATIONAL ORGANIZATION OR ENTITY COVERED BY THIS SURVEY REPORT IS PART OF A MULTI-CAMPUS INSTITUTION, OR PART OF A SYSTEM OF INSTITUTIONS, PLEASE ENTER THE NAME OF THE INSTITUTION OR SYSTEM BELOW.
IF NOT APPLICABLE, CHECK HERE → ☐

### DEFINITIONS

**MULTI-CAMPUS INSTITUTION.** An organization bearing a resemblance to an institutional system, but unequivocally designated as a single institution with either of two organizational structures: (1) an institution having two or more campuses responsible to a central administration (which central administration may or may not be located on one of the administratively equal campuses) or (2) an institution having a main campus with one or more branch campuses attached to it.

**MAIN CAMPUS.** In those institutions comprised of a main campus and one or more branch campuses, the main campus (sometimes called the parent institution) is usually the location of the core, primary, or most comprehensive program. Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is also the location of the central administrative office

**BRANCH CAMPUS.** A campus of an institution of higher education which is organized on a relatively permanent basis (i.e., has a relatively permanent administration), which offers an organized program or programs of work of at least 2 years (as opposed to courses), and which is located in a community different from that in which its parent institution is located. To be considered in a community different from that of the parent institution, a branch shall be located beyond a reasonable commuting distance from the main campus of the parent institution.

**INSTITUTIONAL SYSTEM.** A complex of two or more institutions of higher education, each separately organized or independently complete, under the control or supervision of a single administrative body.

**OE FORM 2300-2.3,** 3/75 PREVIOUS EDITIONS OF THIS FORM ARE OBSOLETE.

## DEFINITIONS

**FIRST-TIME STUDENTS.** Entering freshmen who have not previously attended ANY college. Include students enrolled in the fall term who attended college for the first-time in the summer of 1975. Also include students who entered with advanced standing *(college credits earned before graduation from high school)*.

**BACHELOR'S-DEGREE-CREDIT PROGRAMS.** Any work creditable toward a bachelor's degree. In 2-year institutions, those programs from which the credits earned are transferable to a bachelor's degree program.

**VOCATIONAL-TECHNICAL PROGRAMS.** Organized occupational curriculums of less than four years, primarily in the vocational and technical fields, not chiefly creditable toward a bachelor's degree. Normally terminal and result in formal recognition such as a certificate or diploma.

**LOWER DIVISION.** In 4-year institutions, includes freshmen and sophomores in bachelor's degree programs. In 2-year institutions, includes students in associate degree programs. Also includes, in all levels of institutions, students in terminal-occupational programs of one, two, or three years that result in formal recognition below the baccalaureate.

**UPPER DIVISION.** Students who have completed the sophomore year and typically are enrolled in a 4- or 5-year bachelor's degree program. *(Students in professional programs of 6 or more years should generally be included on line 08).*

**UNCLASSIFIED STUDENTS.** Not candidates for a degree or other formal award, although taking courses in regular classes with other students. This category includes students who cannot be classified by academic level as well as students who already have degrees but who are taking additional courses at the same degree level or lower; this also applies to students with degrees below the baccalaureate at 2-year institutions.

**FIRST-PROFESSIONAL STUDENTS.** Students enrolled in a professional school or program which required at least 2 academic years of college work for entrance and a total of at least 6 years for a degree. Report only students in those first-professional degree programs in the field of medicine, law, and theology specified in Part A of OE Form 2300-2.1, Degrees and Other Formal Awards Conferred. Students in programs requiring only 4 or 5 years beyond high school should be reported as undergraduates.

**GRADUATE STUDENTS.** Students who hold the bachelor's or first-professional degree, or equivalent, and are taking work at the graduate level which is creditable toward a master's or doctor's degree.

**FULL-TIME STUDENTS.** Those whose academic load-coursework or other required activity-is at least 75% of the normal full-time load.

**NORMAL FULL-TIME LOAD.** Usually determined by dividing the total number of credits required for completing the program by the number of terms normally required to obtain them.

**FULL-TIME-EQUIVALENT (FTE) ENROLLMENT OF PART-TIME STUDENTS.** Convert part-time students into full-time equivalents by one of the following:

(1). Use a method already employed in your institution to compute FTE's for some other purpose.

(2). Sum the credit hours for part-time students and divide by the NORMAL FULL-TIME CREDIT-HOUR LOAD. Note: Divide by the NORMAL, OR AVERAGE, full-time load, not by the MINIMUM full-time load. For most institutions, this will be 15 credit-hours (not 12).

(3). Assign a fractional value of full-time to each part-time student, appropriate to your institution, such as 1/4, 1/3, or 1/2. Remember that a student taking 3/4 (75%) or more of a normal full-time load should be classified as a full-time student.

**NORMAL FULL-TIME CREDIT-HOUR LOAD (column 7).** Usually determined by dividing the total number of credits required for completing the program by the number of terms normally required to obtain them. Do not confuse this with the MINIMUM number of credit-hours required for a student to be classified full-time (75% of a normal full-time load).

**TOTAL CREDITS ENROLLED FOR (column 8).** For each line on the form, the total number of credit-hours accounted for by the total (headcount) number of students reported in column 5. This count should be determined by the level of the student, NOT by the level of the course he is taking.

NOTE: No matter what the calendar system, report on this questionnaire only those students enrolled and only those credit-hours being earned during the FALL TERM.

## INSTRUCTIONS

*NOTE: Listing of data for individual institutions are regularly included in published reports of this survey*

Proofread the completed report before returning it to National Center for Education Statistics.

This report should include only college-level students taking work creditable toward a bachelor's or higher degree or some other formal recognition below the baccalaureate.

If you need clarification of any item on the questionnaire, please call the Survey Director, Mr. George H. Wade, NCES, (202) 245-8392, in Washington, D.C.

If exact counts are lacking for a particular category of students that should be reported, include an estimate for that group.

Do NOT fill out separate forms for extension centers. Only campuses with their own FICE code numbers should be reported on separate questionnaires. Extension students should be reported on the form for the main campus.

COMPLETE THIS FORM as soon as detailed enrollment breakdowns are available, but no later than October 15, 1975.

Do NOT include in this report:

(a) Students in noncredit adult education courses.

(b) Students taking courses at home by mail, radio, or television.

(c) Students enrolled only for "short courses."

(d) Auditors.

(e) Students studying abroad if their enrollment at the reporting institution is only an administrative record and the fee is only nominal.

(f) Students in any branch campus or extension center in a foreign country.

(g) High school students taking college courses.

(h) Students known to be enrolled concurrently at another college or university, if the latter will report their enrollment (to avoid double-counting). Normally, the institution that will eventually grant the degree should report the student's enrollment.
